

Choose the arena for the Handler fight

Four ways to stage Level 3's boss fight. The combat, Kai, the Handler and the HUD stay exactly the same. Only **where** the fight happens changes.

Each option has a cinematic shot and an in-game shot from the real third-person camera, with the real health and stamina HUD.

These are real renders, not paintings. Every image comes from our Three.js build, using our own Kai and Handler models and the free CC0 asset packs we already have. What you see is what the game can look like.

How to vote: look through the pages, then fill in the ballot on the last page with your 1st and 2nd choice.

OPTION A · RECOMMENDED IN THE THEME PLAN

Overgrown Shrine

A forgotten jungle shrine, quietly wired into the network.

OPTION A · IN-GAME VIEW

Gameplay camera with the real FightHUD. Kai lands a counter-kick on the Handler in phase II.

The hidden server room was never in a mine. It sits under an old stone shrine that the jungle has swallowed. Kai follows the signal off the road, and the Handler corners him in the sunlit courtyard, with a waterfall roaring behind the gate.

Overgrown Shrine

MOOD

Golden hour. Moss, warm stone, sun shafts through the canopy, pollen in the air.

COLOUR PALETTE

Moss #5f9a2e	Old stone #7a7c66	Sun haze #f4e2b0	Pool #2f7f7a	Bark #3f1d0c

SIGNATURE SHADER

Flowing waterfall and pool (an animated, time-driven ShaderMaterial).

AT A GLANCE

Visual wow					
Fighter readability					
Assets in hand					
Build effort					

WHY PICK IT

- Every asset is already in hand
- Open, bright and easy to read
- Round courtyard keeps the current arena size and camera

WATCH OUT FOR

- Lots of foliage: keep tree count and shadows in check on laptops

BUILT FROM

Modular Ruins (gate, columns, statues, overgrown walls) · Simple Nature Pack (trees, bushes, grass) · Ground040 forest floor

OPTION B

Cliffside Monastery

No way out but down.

OPTION B · IN-GAME VIEW

Gameplay camera with the real FightHUD. Kai lands a counter-kick on the Handler in phase II.

The uplink is hidden in a monastery built into the mountain. The Handler catches Kai on the open terrace, with gothic arches on one side and a sheer drop to the valley on the other. Prayer flags snap in the wind.

Cliffside Monastery

MOOD

A cold, crisp morning. Pale stone, red banners, warm torchlight against blue sky.

COLOUR PALETTE

				
Sky #3f74b8	Stone #9c988e	Banner #a3262a	Snow #f4f7fb	Torch #ff9a4a

SIGNATURE SHADER

Drifting mist banks below the terrace (a moving fog plane).

AT A GLANCE

Visual wow					
Fighter readability					
Assets in hand					
Build effort					

WHY PICK IT

- Most epic silhouette: a duel on a ledge
- Cheapest shader of the four
- Strong colour contrast keeps both fighters readable

WATCH OUT FOR

- The HDRI we got is a city street, so the sky has to stay painted
- Distant mountains are low-poly (fine at a distance)

BUILT FROM

Modular Ruins (gothic arches, doors, banners, torches, balustrade) · Fantasy RTS (temple, towers, mountains) · Rock064 cliff

OPTION C

Desert Canyon Outpost

Dead tech under a burning sky.

OPTION C · IN-GAME VIEW

Gameplay camera with the real FightHUD. Kai lands a counter-kick on the Handler in phase II.

The server room is bolted inside an old relay station at the bottom of a box canyon. There's sun-bleached metal, a red-and-white mast, and a rack of blinking lights behind the door the Handler is guarding.

Desert Canyon Outpost

MOOD

Late afternoon. Long shadows, orange sandstone, a cyan glow from the servers.

COLOUR PALETTE

				
Sandstone #c98a5a	Haze #f6d6a6	Sky #3a76c4	Mast #d23a2a	Server glow #4ff0d8

SIGNATURE SHADER

Heat haze over the sand, reusing the lava shader's time-distortion maths.

AT A GLANCE

Visual wow	
Fighter readability	
Assets in hand	
Build effort	

WHY PICK IT

- Closest to the old Deephold warm palette
- The canyon walls form the arena boundary for free
- Least new shader work, and the server room is visible on screen

WATCH OUT FOR

- Tall walls hide most of the sky, so it can feel enclosed
- The relay station is built from simple shapes

BUILT FROM

Rock029 sandstone · Ground051 dirt · Concrete042C pad · Metal022 shed · Fantasy RTS rocks, crates and barrels · Ruins dead trees

OPTION D

Coastal Cliffs

The last stand at the edge of the world.

OPTION D · IN-GAME VIEW

Gameplay camera with the real FightHUD. Kai lands a counter-kick on the Handler in phase II.

The uplink is a concrete bunker on a sea cliff. At sunset the Handler makes his last stand on the exposed rock shelf. A lighthouse blinks on the headland and the ocean waits thirty metres below.

Coastal Cliffs

MOOD

Sunset, backlit. Purple-orange sky, sea glitter, gulls overhead.

COLOUR PALETTE

				
Dusk #25335e	Sunset #f6a774	Deep sea #0d2a46	Cliff rock #9a9298	Bunker glow #4ff0d8

SIGNATURE SHADER

Animated ocean with rolling waves, sun glint and foam.

AT A GLANCE

Visual wow	     
Fighter readability	     
Assets in hand	     
Build effort	     

WHY PICK IT

- The biggest "wow": the most cinematic of the four
- Open horizon, no walls needed

WATCH OUT FOR

- Backlit sunset darkens the fighters, so it needs a fill light
- The ocean shader is the most work of the four

BUILT FROM

Rock064 cliff · Simple Nature Pack rocks and grass · Fantasy RTS watchtower (lighthouse) and port · Concrete042C bunker

SIDE BY SIDE

How the four compare

	A - Overgrown Shrine Theme plan pick	B - Cliffside Monastery	C - Desert Canyon Outpost	D - Coastal Cliffs
Signature shader	Waterfall + pool	Drifting mist	Heat haze	Ocean
Shader effort	Low	Lowest	Lowest (reuses lava maths)	Highest
Assets in hand	All of them	All (sky is painted)	All + simple-shape station	All + simple-shape bunker
Fighter readability	High: sunlit courtyard	High: dark suits on pale stone	Good: warm side light	Medium: backlit sunset
Visual wow	High	High	Medium	Highest
Palette	Green and gold	Cold blue and red	Warm orange (closest to Deephold)	Dusk purple and orange
Main risk	Foliage performance	Distant mountains look simple	Feels enclosed	Ocean shader time

TEAM VOTE

Pick your arena

Name	A	B	C	D

Write **1** for your first choice and **2** for your second. Most points wins (1st = 2 pts, 2nd = 1 pt).

What stays the same, whichever we pick

- Combat: punch and kick chains, dodge, block and parry, lock-on, hit-stop, the three health phases and the helmet-off reveal
- Kai and the Handler models, colours and animations
- The FightHUD and touch controls
- The story beat: the Handler corners Kai where the chase ends

What changes: only the arena dressing, the lighting, the sky and one shader inside Level103.js.
